

MEGHANA U

ASSOCIATE SOFTWARE ENGINEER — SOFTWARE DEVELOPER

+91 8618704290 | meghanaachar55@gmail.com | linkedin.com/in/meghana | github.com/meghana

PROFESSIONAL SUMMARY

Detail-oriented Master's student in Computer Applications with strong proficiency in Python, Java, and full-stack web development. Experienced in designing and implementing RESTful APIs, database-driven applications, and secure authentication systems through academic and real-world projects. Solid understanding of data structures, object-oriented programming, and software development lifecycle. Actively seeking an Associate Software Engineer role to contribute to scalable, reliable, and high-performance software solutions.

EDUCATION

Cambridge Institute of Technology , Bangalore, India <i>Master of Computer Applications (MCA)</i> CGPA: 8.61	Nov 2023 – Dec 2025
Sahyadri Science College , Shivamogga, India <i>Bachelor of Science</i> Percentage: 76.03%	Aug 2020 – May 2023
Government PU College , Sorab, Karnataka, India <i>Pre-University Course (PUC)</i> Percentage: 69.33%	Aug 2018 – Jul 2020

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C, SQL
Frontend Technologies: HTML5, CSS3, React.js
Backend Technologies: Flask, Node.js, Express.js, RESTful APIs
Databases: MySQL, MongoDB
Developer Tools: Git, GitHub, VS Code
Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, Debugging, Secure Coding Practices

PROJECTS

- Student Attendance Tracker** — *Flask, MySQL*
- Designed and developed a secure full-stack web application for managing student attendance
 - Implemented role-based authentication for students and faculty using session management
 - Built RESTful APIs for attendance tracking, reporting, and data retrieval
 - Improved data accuracy and system reliability through backend validation and debugging
 - Used Git for version control and collaborative development workflows
- Food Donation Application** — *React, Node.js, Express.js, MongoDB*
- Developed a web-based platform to connect restaurants, shops, and NGOs for food donation
 - Implemented user registration, login, and role-based dashboards for donors and NGOs
 - Created RESTful APIs to manage food listings, donation requests, and delivery status
 - Ensured data integrity and security through backend validation and access control
- Google Play Store Data Analysis** — *Python*
- Analyzed large-scale datasets using Pandas and NumPy to identify market trends
 - Visualized insights on app categories, ratings, and install counts using Matplotlib
 - Extracted actionable insights to support data-driven decision making

CERTIFICATIONS

The Joy of Computing Using Python – NPTEL (Jan–Apr 2025)
Artificial Intelligence Fundamentals – IBM SkillsBuild (Aug 2024)
Java Intermediate – Sololearn (Aug 2024)
Python Programming – CodSoft (Sep–Oct 2024)
Python Developer – Nezuware (Oct 2024)
