

# MEGHANA U

Associate Software Engineer — Software Developer  
+91 8618704290 | meghanaachar55@gmail.com | [LinkedIn](#) | [GitHub](#)

## PROFESSIONAL SUMMARY

Associate Software Engineer aspirant and Masters student in Computer Applications with strong hands-on experience in Python, Java, and JavaScript. Experienced in designing, developing, and testing full stack web applications. Proficient in REST API development, database integration, debugging, and version control using Git. Solid foundation in data structures, object-oriented programming, and software development lifecycle. Seeking an entry level role to contribute to scalable, secure, and high-quality software solutions.

## EDUCATION

|                                                                                               |                                   |

## TECHNICAL SKILLS

**Programming Languages:** Python, Java, JavaScript, C, SQL  
**Web Technologies:** HTML5, CSS3, React  
**Backend Technologies:** Flask  
**Databases:** MySQL  
**Developer Tools:** Git, GitHub, VS Code  
**Platforms & OS:** Linux/Unix Basics, Windows  
**Core Concepts:** Data Structures, OOP, REST APIs, SDLC, Debugging, Secure Coding  
**Cloud & DevOps (Basic):** Docker, Cloud Fundamentals

## PROJECTS AND ACADEMIC EXPERIENCE

- Student Attendance Tracker** — Flask, MySQL
- Designed and developed a full stack web application to automate student attendance management
  - Implemented secure authentication and role-based access control for students and faculty
  - Developed REST APIs for attendance tracking, reporting, and database integration
  - Handled backend validation, error handling, and debugging to improve reliability
  - Used Git and GitHub for version control and project collaboration
- Food Donation Application** — React, Node.js, Express.js, MongoDB
- Built a web-based platform connecting donors, shops, and NGOs to reduce food wastage
  - Implemented user authentication, authorization, and role-based dashboards
  - Created REST APIs to manage food listings, donation requests, and request status
  - Ensured data integrity and secure access through backend validation
- Google Play Store Data Analysis** — Python
- Performed data cleaning and exploratory data analysis on large datasets
  - Visualized trends in app categories, ratings, and installation counts
  - Extracted insights to support data driven decision making
